USOSweb – how to reset/generate your password

Make sure you have your unique username (e.g. 007000XXXXX). You can obtain one in Dean's Office.
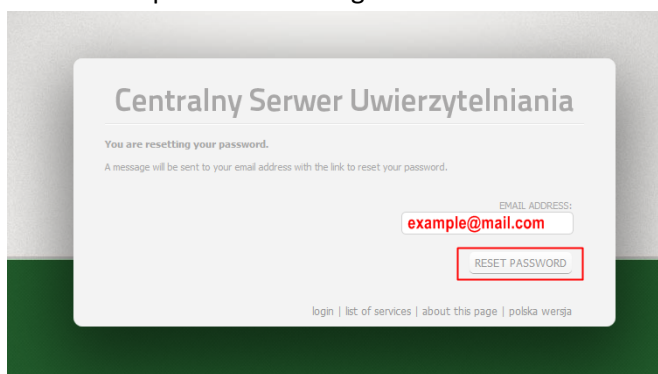

1. Go to https://usosweb.pb.edu.pl
2. Click „log in"

3. Click „forgotten password"

4. Type your e-mail address. USOSweb only accepts e-mail addresses officially declared during recruitment process. To change e-mail visit Dean's Office.

A message will be sent to your e-mail address with the link to reset your password.

Note: USOSweb has several technical breaks for data migration at certain times of the day – 8:15, 11:15, 14:15, 18:15 and 00:15. These breaks last about 20-25 minutes. For example – if you reset your password at 13:00, log in with a new password sent to your e-mail after the migration – at about 15:00 or later.
